

Yarning energy

– tips and tricks to save on your energy bill

AGL is working with First Nations Foundation to make it easier for indigenous people to understand energy.

CLEVER WAYS TO SAVE

Customers and energy experts have shared their tips for reducing energy usage. Perhaps there are some ideas that could help you save money on your energy bill.

- Choosing to purchase energy efficient white goods and electrical appliances with higher energy efficiency star ratings. This also applies to water efficient appliances.

- Opting to hang washing out on the clothesline rather than using the dryer.
- Changing your light bulbs to energy efficient bulbs.
- Switching your electrical appliances off at the main power switch when not in use.
- In summer closing curtains, blinds or shutters during the day.
- In winter open curtains, blinds or shutters to allow natural light and heating from the sun. You can also use door snakes to block out draught.
- Wash your clothes on a cold cycle rather than a hot cycle.

Some energy providers may have energy saving tips on their website. If you are an AGL customer visit [agl.com.au/waystosave](https://www.agl.com.au/waystosave) for information on how to track where you're using the most energy, and ways to save.
